This case is being closed by the San Francisco Division inasmuch as a review of the 27 volumes of this case fails to indicate any concrete information whatsoever since the Subjects were discovered missing from Alcatraz on June 12, 1962, that they ever made the mainland, and are undoubtedly dead.

It is noted that debris boats that sweep the San Francisco Bay Area surrounding Alcatraz located a piece of flotsam on June 14, 1962, in a whirlpool approximately one-half mile east of Alcatraz. This consisted of two olive drab packets constructed of material similar to that used in the rain coats worn by people on Alcatraz at the time. These packets were sealed at the outer edges in similar fashion to that used in the construction of a Mae West type life jacket previously recovered on Alcatraz. The packets also contained personal effects and papers positively identified as those of Subject, JOHN ANGLIN.

The U.S. Coast Guard during this same period also located a homemade paddle constructed of plywood and pine floating in the water near Alcatraz, which prison officials at that time concluded was made from material on Alcatraz. A similar type paddle was recovered on Alcatraz, which was apparently prepared for the escape attempt, but not used.

On 6/15/62, a Mae West type life jacket was recovered 3 1/4 miles west of the Golden Gate Bridge on the Marin County California side. This jacket was identical in color, composition, and construction to the Mae West type life jacket belonging to inmate [REDACTED] previously turned over to FBI authorities by Alcatraz prison officials. In addition, the Coast Guard also recovered a black plastic cargo covering similar to the type used on Alcatraz. b7C

Newspapers speculated at the time the escape occurred that an excellent swimmer conditioned over a long period of time to extremely cold water could possibly make the swim from Alcatraz to the mainland if he were in excellent condition. The papers further noted a person not in excellent condition and exposed to cold water over a long period of time would meet virtually insurmountable hazards making it almost impossible for an inexperienced swimmer, such as the prisoners on Alcatraz to make the mainland safely. The San Francisco coroner at the time of the escape attempt reported water

- B -

COVER PAGE

temperature in San Francisco Bay was 54 degrees and that a man, even in excellent physical condition, could not remain in this cold water longer than 30 minutes without seriously affecting his body functions.

Extensive and exhaustive investigation was conducted at the time of the escape and covered all the waters of the bay, harbors, shorelines, marinas, and yacht basins and failed to develop even the slightest evidence to establish the inmates could possibly have reached the mainland.

Wanted flyers and IOs have been in existence on the Subjects since their escape. Much publicity has been given to this case over the years and no positive information has ever been developed the Subjects survived the escape attempt.

Relatives contacted over the years have all reported they believe the Subjects are dead and feel active investigation by the Federal Government to locate them at this time is futile and unnecessary.

Even though this case is being considered closed as far as active investigation is concerned, wanted flyers and IOs will remain in effect and all Subjects are currently listed in NCIC. In the event any positive information is ever developed regarding this matter, the case, of course, would be immediately reopened and investigation pursued.

 SPECIAL EXHIBITS SECTION)

FROM: SAC, SAN FRANCISCO (76-2887)

SUBJECT: ALCOS

Enclosed for the Special Exhibits Section are 36 photographs, 25 negatives, and 1 diagram. Along with the photographs, the Bureau is being sent 13 negatives which correspond to those photos in the evidence category. It is requested that negatives be made of the remaining photographs so that appropriate display prints may be obtained. It is also requested that upon completion of the use of the remaining photographs, they all be returned to this division inasmuch as they are the only copies in the file in the San Francisco Division.

The San Francisco Division is interested in increasing the variety of material visual aids used in tours of the divisional space. A major historical case display is being proposed to accomplish this desire.

San Francisco is desirous that the Special Exhibits Section create a wall display that is comprised of a title, a display of three identification orders and three horizontal rows of pictures depicting three different phases of the subject matter. The height of the exhibit should be no more than five feet and if possible, exactly five feet. The length is variable. The horizontal rows of photos would display photographs of a size determined sufficient by the Exhibit

Section to both be small enough for easy display and large enough for easy viewing. Captions below the photos will be set out in later paragraphs. An example of the desired format is attached to this airtel for use in determining basic structure.

The photographs which will be displayed in the three horizontal rows are being forwarded with this communication and are comprised of the crime scene photos which number 12, the escape route photos which number 11, and the evidence photos which number 13.

The title should read, "Escape From Alcatraz".

The three identification orders which should be displayed are IO's numbers 3584, 3583, and 3582.

The photographs will be:

Pictures of crime scene. These are numbered and described on their backs. Please mount them in sequence and with their appropriate captions as stated on their reverse side.

Down a column, second row: These photos are of the escape route. They are numbered 13, 15, 16, 19, 20, 21, 22, 23, 24, 28, and 29. They should be mounted in that sequence and use the statements on their reverse as their captions.

Third row: These are the color photos of the evidence as laid out in the San Francisco Division. No captions are required and they may be mounted in any order desired. They should bear under caption entitled as, "Evidence of the Crime".

The Exhibits Section is requested to use color photos where possible in preparation of this display.

Paramount Pictures Corporation, currently producing film "Escape From Alcatraz" furnished letter they had received from [REDACTED] b7C
[REDACTED] indicating he had written a novel which included several chapters about the escape from Alcatraz. [REDACTED] said he served time at McNeil Island for a draft violation and while there talked to some former Alcatraz inmates. One "old timer" told him of the extensive planning and work that went into the escape as a challenge to get one man ashore. He indicated the "prisoner grapevine" said the three men showed up safely in Mexico and one prisoner reportedly saw a postcard the Warden of Alcatraz had received from Mexico. Reportedly, the Warden admitted he had received such a postcard to a group of newsmen who visited Alcatraz soon after it was shut down. He also claimed there existed on Alcatraz a dungeon deep in the "rock" which was used as punishment of last resort. It was reportedly here that a prisoner kept track of tides to form a tide table, which was used in the planning of the escape.

[REDACTED] was interviewed January 13, 1979, and related the above information. He said the "old timer" he referred to was an inmate at McNeil Island known as [REDACTED] but he did not have his name. He also indicated the newsmen who saw the Warden when he admitted receiving a postcard from Mexico was [REDACTED] this being about 1963. He stated all of the information he has is hearsay and he has no specific information any of the three subjects ever made it to shore during the escape. It was pointed out to [REDACTED] the FBI is interested b7C b7D

in following through on any specific information which would indicate any one or all three subjects were able to make good their escape or any trace of them since the escape. He again stated he had no specific information and all he had was hearsay which went back many years.

Inasmuch as there is no new specific information and all logical investigation was previously conducted without obtaining any indication subjects made it ashore after the attempted escape, they are presumed to be dead. Therefore, this case is being placed in a P* status for a period of one year.
